

think • go climate conscious

atmosfair

Certificate

for the support of climate protection

Philipp Kreutzer
supports atmosfair on May 20, 2021 with
100.00 Euro.

What does your climate protection contribution accomplish?

With your contribution you support the following projects, among others:

Food & Energy in Madagascar

**Electricity generation from
mustard seed crop residues in
India**

**Solar water desalination system
in Kenya**

Worldwide we lack 700 billion Euros every year needed to reach the Paris Agreement with clean energy. Thank you for your contribution to filling this gap! We use your climate protection contribution to establish and expand renewable energy projects in the Global South, such as the Food & Energy plant for clean power generation in connection with a greenhouse in Madagascar, power supply from mustard harvest residues in India or the solar-powered water treatment plant in Kenya. This way we are driving forward the global energy transition. In addition, this creates jobs and new perspectives for locals.
